Technical Datasheet

CL-MOLD

Special antimold agent

Description

Special liquid with antifungal activity for both indoor and outdoor use. It cleans and disinfects surfaces from mold, bacteria and algae.
It is odorless, thus environmentally and user friendly.

Fields of application

It can be applied on painted surfaces affected by mold, but it also acts proactively to prevent the growth of microorganisms on the surface of the paint, in highly humid spaces. It is very effective when used on walls, ceilings, natural stones, bricks, cement, etc. Furthermore, it can be used for fungal decontamination and maintenance of sanitary conditions in areas such as kitchens, restaurants, hotels, industries or food warehouses, bakeries, etc.

Technical data

Form:	liquid
Color:	light blue
Density:	1 kg/l
pH:	6-7

Directions for use

As a liquid for removing mold: CL-MOLD is applied undiluted on the surface affected by mold, bacteria or algae, with a cloth or sponge and is left to act for at least 24 hours. We then remove the mold residue with a sponge, rinse with clean water and allow to completely dry.
Preventive use: We apply CL-MOLD onto the painted surfaces from time to time to ensure long-term protection from the growth of microorganisms.
Disinfectant use: As a disinfectant liquid, CL-MOLD is applied on surfaces diluted with water at a ratio of 1:10.

Consumption

15-20 m^2/l, depending on the surface absorption.

Packaging

1 l containers.

Storage

24 months from production date, if stored in original, unopened packaging, at temperatures between +5°C and +35°C. Protect from direct sun exposure and frost.

Remarks

Consult the directions for safe use and precautions written on the package.
